Infection with New Coronavirus

The Company confirmed two employees working in the Headquarters building (80 Itado, Isehara City, Kanagawa Pref.) and one employee in the Mirror Plant (1360 Fujioka, Fujioka City, Gunma Pref.) have been infected with New Coronavirus.

We checked the persons' activity history and identified people who had contacts with the persons. For those identified, the Company instructed them to stay at home and perform PCR tests to avoid further infection. Besides, There is no effect on our production in all of our plants.

We sincerely apologize for any anxiety or concern that this may cause to customers, suppliers, people in the surrounding regions and all the others concerned.

We have implemented all the measures to avoid our employees from catching the virus, such as frequently washing their hands and wearing masks, and also have made maximum efforts to identify infected or possibly infected employees at the earliest possible stage. We will further strengthen those efforts to avoid infection and to secure safety and health of our employees.
