

HID Bulb Kit "Finally, the long-awaited real <4300K> is born."

VELIAS
The Real **4300K**
HID Bulb Kit
Series

HID (High Intensity Discharge) head lamp system is a completely new type of light source where light is emitted by high voltage discharge by a computer controlled voltage converter instead of the conventional light source where the filament is red heated and converted to light. Ichikoh newly developed a general purpose kit based on this HID system which is attracting interest as the light source of the 21st century and which is employed as the genuine part for Skyline GT-R. Bluish white color long awaited by users is realized by the industry's first color temperature of **4300K** compared with the conventional color temperature of 3900K.

It is applicable to almost all cars.

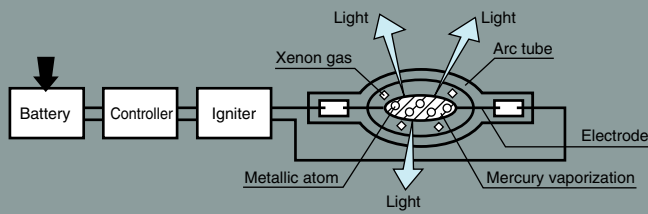

Low beam bulb of the head lamp is replaced. Because bulb is the only component to be replaced, it can be applied to almost all cars.

Accuracy of genuine parts level is maintained.

Light source position is adjusted using a focus machine for 100% to assure accuracy level of genuine parts. Carefully planned anti-EMI design helps to clear international standards for electric noise. Safety features, such as discharge shut out function which cuts the power in 1 second or less in case of accident, are provided.

Principle of HID bulb light emission.

12V power from the battery is converted to AC power by a computer, and supplied to the bulb.

	HID Bulb	H1 Halogen Bulb
Bulb rating	12V 35W	12V 55W
Light beam	3200 lm	1500 lm
Color temperature	4300K	3200K
Lighting color	Bluish white	Yellowish white
Life	1500 hours	400 hours

Brightness close to sunlight and gentle to eyes is realized.

It is a high efficiency lamp system of the next generation with 3 times the brightness and approximately 1/2 the power consumption comparing to those of the halogen lamp. Because of its overwhelming brightness, it is easy to drive on mountain roads or in rain at night without fatigue. Uniquely beautiful bluish white light will dramatically change your driving scene at night.

Comparison of illuminance with halogen lamp. (Unit: Lx)

Kit components.

- HID bulb 2 ea
- Controller 2 ea
- Igniter 2 ea
- Igniter stay 2 ea
- Sub harness 2 ea
- Relay harness 2 ea
- Accessory part 1 ea

Suggested retail price. ¥98,000 (excluding tax)/4300K (Installation cost is not included in the product price.)

Attention!!

- Because this kit is intended for bulb replacement and field retrofit, its performance is dependent on the degradation level of the existing head lamp.
- Specifications and price of the product are subject to change without notice.
- Color tone and illumination condition on the photos herein may look different from those of actual cases depending on the photographing and printing conditions.
- As the product prices do not include consumption tax, please pay the tax separately.
