Notice of the start of vaccination against new coronavirus

In line with the government's policy on vaccination against new coronavirus at workplaces, we will start vaccination at workplaces for about 1,000 employees at our headquarters, Isehara plant, and Atsugi plant.

Inoculation day : September 5 (Sunday), September 12 (Sunday) (Tentative)
Inoculation location : Ichikoh headquarters/ Isehara Plant
Vaccination Target : Employees of the Company who wish to be vaccinated
Vaccine : Vaccine manufactured by Moderna distributed by the government

At present, the spread of the new coronavirus is continuing and the area declared a state of emergency is broadening. To be in line with the government's policy of preventing the spread of infection by increasing the vaccination rate, we would like to contribute to the prevention of infection among employees, reduce the burden on all concerned, and relieve the anxiety of local residents through this vaccination.

We would like to express our deepest respect and heartfelt gratitude to all the people involved in the medical field, including the government, who are making front-line efforts to prevent the spread of the new coronavirus infection.

END
